

Effect Pigment Product Lines by Technology

Synthetic Mica

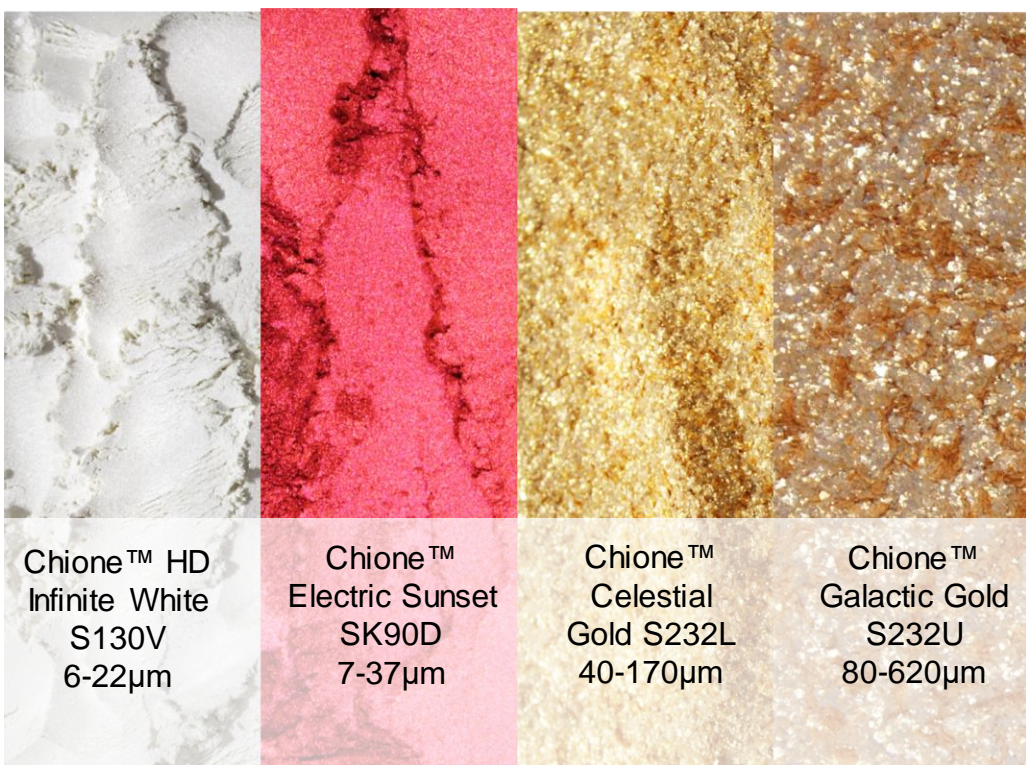

- INCI: Synthetic Fluorphlogopite
 - Synthetically made, delivering a pure white substrate that creates bright and clean color and effects, perfect for color cosmetics and skin care applications
 - High purity and a low heavy metal profile
 - Emulating the properties of natural mica, it is safe and commonly used in beauty formulations
 - No limitation on particle size, ideal for large particle size products and PET glitter alternatives
- Sun Chemical offers one the broadest ranges of synthetic mica effect pigments, including the following product lines:
- Chione™
 - INTENZA®
 - SunSHINE®

Product Line: Chione™

A range of effects and colors in the Chione™ Line:

Chione™ HD Infinite White S130V 6-22µm	Chione™ Electric Sunset SK90D 7-37µm	Chione™ Celestial Gold S232L 40-170µm	Chione™ Galactic Gold S232U 80-620µm
---	---	--	---

Particle size range: small to large

- Line of synthetic mica-based effect pigments and performance minerals
- Encompasses a range of particle sizes and coatings creating a variety of effect pigments to fulfill the diverse needs of formulators
- Synthetic mica effect pigments deliver bright color and clean effects because of the pure white substrate
- Low heavy metal profile
- Explore the various product families within the Chione™ product line; find product details in our brochures and/or Pigment Finder:

Product Family	Description
Chione™ HD*	A range of small particle size interference effects available in multiple colors delivering a satin finish. Ideal for skin care applications.
Chione™ Pixel	Classic interference white in a sparkling to glittering finish
Chione™ Electric	An innovative family of metallic-like effect pigments that utilize multilayer technology to deliver vibrant high chroma color in a shimmering effect
Chione™ Celestial	Metallic effect pigments with a large particle size creating a sparkling to glittering effect; available in gold and rouge
Chione™ Galactic	Metallic effect pigment with an extra-large particle size range that delivers ultra glittering effects. Ideal for a micro-plastic free PET glitter alternative
Chione™ Astral	Interference effect pigment with an extra-large particle size range that delivers ultra glittering effects. Ideal for a micro-plastic free PET glitter alternative

*includes HD family+ Snowfall White
Chione™ M-SVA is featured as a performance mineral in Formulation Solutions
