## Method of Manufacture

Into the main vessel add:

---

Saboderm TCC	Start the mixer on a slow speed
--------------	---------------------------------

Unimer U-1946

---

Floraesters® 20	Mix until dispersed	Commence heating the main vessel to 80-85C
-----------------	---------------------	--

---

Ensuring each material has melted before adding the next, into the main vessel add:

---

Seatons Carnauba wax	Mix until melted
Beeswax	Mix until melted
Floraesters® 60	Mix until melted

---

Once all the waxes have melted and the product is at 80-85C, into the main vessel add:

---

C84-3512 SunSHINE® Crystal Golden

C91-1211 INTENZA® FIREFLY

---

C84-8240 SunSHINE® Mystic Black	Mix until fully dispersed
---------------------------------	---------------------------

---

Maintain the temperature at 80-85C

---

Ensure the product is lump free and homogenous.	Use a homogeniser if necessary
---	--------------------------------

---

When the product is lump free and homogenous commence cooling to 76C

---

When the product is at 80C, into the main vessel add:

---

Euxyl® PE 9010	Mix until homogenous
----------------	----------------------

---

Reduce the mixer speed to medium\slow

---

Continue to cool to 50C

---

When at 50C pack into appropriate gondo#las

## Product Specifications

---

pH	N\A
Viscosity	N\A
Colour	Black\Brown with yellow shimmering flecks
Appearance	Sparkly Black Solid
