

Water-based Nail Polish - Pure Red

Pure bright red nail polish with excellent opacity. It contains **Worléeaqua Nail 100** with excellent curing for high scratch resistance. The formulation is cold process and without the need for expensive equipment. The colour is achieved with **WorléeBase AQ** preprepared water soluble pigment dispersions.

Trade Name	INCI Name	Function	%W/W	Supplier
1 WorléeAqua Nail 100	Aqua, Polyacrylate-42, Dibutyl Sebacate, PPG-2 Methyl Ether, Oxidized Polyethylene, Phenylpropanol, Caprylyl Glycol, Decylene Glycol	Water soluble nail polish base	94	Worlée De Via Protec Ingredia
2 WorléeBase AQ 15850:1/1	Aqua (and) CI 15850 (and) Barium Sulfate (and) Ammonium Acrylates Copolymer (and) Methylpropanediol (and) Sodium Acrylates Copolymer (and) Caprylyl Glycol (and) Phenylpropanol (and) Simethicone	Water soluble pigment dispersion	6	Worlée De Via Protec Ingredia

Method of Manufacture

Into the main vessel add:

WorléeAqua Nail 100 Start the mixer on a slow speed

Slowly add the following into the main vessel:

WorléeBase AQ 15850:1/1 Mix until homogenous.

Mix for a further 10 minutes to ensure all the ingredients are adequately mixed.
